Sequence 1, Application US/10329960
Publication No. US20030099277A1
GENERAL INFORMATION:
TITLE OF INVENTION:
TITLE OF INVENTION: Nucleotide Sequence of the Haemophilus influenzae Rd Genome, Fragm
TITLE OF INVENTION: Thereof, and Uses Thereof
FILE OF INVENTION: UNMBER: US/10/329,960
CURRENT FILING DATE: 2000-08-23
PRIOR PILING DATE: 1995-06-07
PRIOR PILING DATE: 1995-06-07
PRIOR APPLICATION NUMBER: US 08/487,429
PRIOR PILING DATE: 1995-04-21
NUMBER OF SEQ ID NOS: 1
SOFFWARE: PatentIn version 3.1
SEQ ID NO 1
LENGTH: 1830121
TYPE: DNA
ORGANISM: Haemophilus influenzae
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       U

GENERAL INFORMATION:
APPLICANT: Gary L. Breton et al.
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO ACINETOBACTER TITLE OF INVENTION: BAUMANII FOR DIAGNOSTICS AND THERAPEUTICS
FILE REPERENCE: GTC99-03PA
CURRENT APPLICATION NUMBER: US/09/328,352
CURRENT FILING DATE: 1999-06-04
NUMBER OF SEQ ID NOS: 8252
SEQ ID NO 3780
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            1022
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          974 AGAAAAGCGGCCTCTATGAAGATGGCGTGCGCAAAGACCGTCTGGACAACAACAATATGA 1033

Sequence 6339, Application US/09252991A

Patent No. 6551735

GENERAL INFORMATION:
APPLICANT: MARC J. Rubenfield et al.
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUI
FILE REFERENCE: 107196.136

CURRENT APPLICATION NUMBER: US/09/252,991A

CURRENT FILING DATE: 1999-02-18

PRIOR FILING DATE: 1998-02-18

PRIOR FILING DATE: US 60/074,788

PRIOR FILING DATE: 1998-07-18

NUMBER OF SEQ ID NOS: 33142

MESCUL: 991A-6131/c

is Sequence 6131, Application US/09252991A

is Sequence 6131, Application US/09252991A

is Patent No. 6551795

is GENERAL INFORMATION:

GENERAL INFORMATION:

ITTLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS

ITTLE OF INVENTION: NUCLEIC ACID AND THERAPEUTICS

ITTLE OF INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS

CURRENT PILING DATE: 1999-02-18

FILE REFERENCE: 107196.136

CURRENT PILING DATE: 1998-02-18

FRIOR APPLICATION NUMBER: US 60/074,788

FRIOR APPLICATION NUMBER: US 60/094,190

PRIOR FILING DATE: 1998-07-27

NUMBER OF SEQ ID NOS: 33142

SEQ ID NO 6131
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           2008
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      1888

US-09-170-187-10/c

Sequence 10, Application US/09170187

Patent No. 6383745

GENERAL INFORMATION:

APPLICANT: Rather, Philip N.

TITLE OF INVENTION: Methods For Screening For Antimicrobials

TITLE OF INVENTION: Utilizing aarC And Compositions Thereof

NUMBER OF SEQUENCES: 13
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Length 886;
